

Boris LEBON

Senior IT Project Manager

ABOUT

IT professional with 20+ years of experience, combining strategic leadership (CTO mindset) with deep technical expertise (Full-Stack Development, DevOps, Architecture, and Security). My background (independent, SMBs, and large enterprises) has given me a unique ability to lead complex projects end-to-end, optimize costs, and align technology with business needs.

Long-term goal Chief Technology Officer (CTO).

SKILLS

Governance & Strategy

Technical leadership (CTO), strategic oversight of complex projects from A to Z, management of teams and cross-functional vendors, budget ownership, and ROI optimization.

Architecture & DevOps

End-to-end modernization of resilient IT architectures, responsive & offline-first, rollout of DevOps factories (Azure, Jenkins, GitLab), and continuous integration & delivery pipelines (CI/CD).

Web & Business Development

Custom ERP solutions (.Net, C#, 4D, Java), high-performance mobile apps (Angular), and complex Web & e-commerce ecosystems (Drupal, Shopify, Webflow, Magento, etc.).

Audit & Security

Penetration testing and proactive management of application vulnerabilities (OWASP, Kali Linux), infrastructure audits, ISO compliance, and defining security policies.

RECENT ROLES

Schenk family SA (2021-2026)

Architecture Modernized the IT infrastructure (Elastic.io iPaaS, Azure DevOps) and automation;
Impact Built a new cross-channel B2B e-commerce platform, cutting costs and improving data reliability.
